Tuning Filters Need Maintenance Too!  
Clean And Replace Your Spark Plug Regularly. The spark plug in a two stroke engine is a high performance part, especially when running a tuned engine it need to ignite often more than 10.000 times per minute. Make sure to check your spark plug regularly (every 500-1000km) and clean it using a metal brush.

## **How To Maintain A Scooter - TuningMatters.com**

Remove the spark plug and add a tablespoon of 2-stroke engine oil to the spark plug opening. Place a rag in the opening and slowly pull the starter mechanism a few times to distribute the oil. If the spark plug is in good condition, reinstall it. If a new plug is needed, replace it before putting the tool in storage.

with ethanol, so it also gets bad when unused for a long time, but less so).

## **Why do 2 stroke engines require more maintenance than 4 ...**

More specifically, the number of strokes that are required of the piston. For example, in order for a 2-stroke engine to complete the entire combustion cycle, consisting of five functions (intake, compression, ignition, combustion, and exhaust), this entire cycle is completed after two piston strokes. In comparison, a 4-stroke engine's cycle is completed after four strokes of the piston — or one crankshaft revolution vs two crankshaft revolutions respectively.

## **2-Stroke vs 4-Stroke - Which Is Better and What's the ...**

The other key difference is that 4-stroke engines use engine oil and require oil changes, whereas 2-strokes do not have a load of oil inside but instead they mix in a little special 2-stroke oil in with the gas which then lubricates the engine as
