Papyrus vs. Other Sedges . Many plants in the sedge family have become popular in landscaping as go-to plants for boggy spots in the yard, especially the genus (Carex), known as the true sedges. The variegated Carex phyllocephala 'Spark Plug' is an example. This palm-sedge cultivar is a great substitute for invasive ribbon grass (Phalaris arundinacea).

In late 1994, Carsten Peter Thiede proposed redating the Magdalen papyrus to the middle of the 1st century (AD 37 to 70). This attracted considerable publicity, as journalists interpreted the claim optimistically. Thiede's official article appeared in Zeitschrift für Papyrologie und Epigraphik in 1995.

### **Magdalen papyrus - Wikipedia**

Papyrus is a material similar to thick paper that was used in ancient times as a writing surface. It was made from the pith of the papyrus plant, Cyperus papyrus, a wetland sedge. Papyrus can also refer to a document written on sheets of such material, joined together side by side and rolled up into a scroll, an early form of a book. An official letter on a papyrus of the 3rd century BCE Papyrus is first known to have been used in Egypt, as the papyrus plant was once abundant across the Nile Del
