The only reason that "A Voyage to Arcturus" is classified as a science fiction book is that it takes place on another planet that required a rocket ship for our hero to reach it. The fact is Tormance, the planet revolving around the binary star Arcturus, could have easily have been another "realm" or "dimension" that could have been accessed by a looking glass or a pair of ruby slippers.

A stunning achievement in speculative fiction, A Voyage to Arcturus has inspired, enchanted, and unsettled readers for decades. It is simultaneously an epic quest across one of the most unusual and brilliantly depicted alien worlds ever conceived, a profoundly moving journey of discovery into the metaphysical heart of the universe, and a shockingly intimate excursion into what makes us human and unique.
