AN ATLAS OF ERECTILE DYSFUNCTION 11. NEUROGENIC CAUSES. The dependence of normal erectile and ejaculatory function on intact neural pathways to and from the brain has already beenmentioned. Not surprisingly a considerable number of neurological disorders may result in erectile dysfunction

An Atlas of ERECTILE DYSFUNCTION

Erectile dysfunction (impotence) is the inability to get and keep an erection firm enough for sex. Having erection trouble from time to time isn't necessarily a cause for concern. If erectile dysfunction is an ongoing issue, however, it can cause stress, affect your self-confidence and contribute to relationship problems.

Erectile dysfunction - Symptoms and causes - Mayo Clinic

Erectile dysfunction (ED) is often a symptom of another health problem. What causes erectile dysfunction? Many different factors affecting your vascular system, nervous system, and endocrine system can cause or contribute to ED. Although you are more likely to develop ED as you age, aging does not cause ED. ED can be treated at any age.
