Power and Architecture. Book Description: Capital cities have been the seat of political power and central stage for their state's political conflicts and rituals throughout the ages. In the modern era, they provide symbols for and confer meaning to the state, thereby contributing to the "invention" of the nation.

“Power” architecture As wealth and expressive functions increase, a special type of domestic building can be distinguished that may be called power architecture. In almost every civilization the pattern of society gives to a few of its members the power to utilize the resources of the community in the construction of their homes, palaces, villas, gardens, and places of recreation.

Architecture as a symbol of power 1. ARCHITECTURE AS A SYMBOL OF POWER INTRODUCTION Architecture is and always has been used deliberately and unintentionally to define relationships among individuals, interest groups, cities, and nations. Those relationships, whether adversarial or not, are based on power. Power can be political, economic, social, cultural or any other.
