it receives from the Arduino in a text box. The Arduino Sketch. The Arduino Sketch sends the string "1234" over the serial connection once every second. At the same time it blinks the built ...

Arduino and Visual Basic Part 1: Receiving Data From the ...

The serial port baud rate is set to 9600, and the Arduino Uno uses COM34. Visual Basic 2008 comes with the SerialPort function, so it's pretty easy to program. All that we need the Arduino to do is read the instructions from the computer and control its on-board indicator in tune with it. The following basic code is sufficient for that purpose.
