measures the amount of air that is being drawn into the engine, and thus the amount of load on the engine.

## **Porsche 911 Motronic Engine Management System Overview ...**

In the early days of automotive engineering, ignition was one of the major technical issues. It was Robert Bosch who came up with the solution in 1897 - he succeeded in adapting a magneto for a motor vehicle engine. Since then, the name Bosch has been a byword for progressive ideas and pioneering technology, particularly in gasoline systems.
