Composite Drawing In Engineering | pluto.wickedlocal

Composite drawing is the most widely known application of forensic art. Composite drawing uses descriptions given by witnesses to create a drawing that is a useful tool for identifying or eliminating a suspect. A composite drawing is not intended to be a portrait of an individual, but more of a two-dimensional likeness that is a visual record of the witness' recollections.

Composite Drawing In Engineering

An engineering drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing. Usually, a number of drawings are necessary to completely specify even a simple component. The drawings are linked together by a master drawing or assembly drawing which gives the drawing numbers of the subsequent detailed components, quantities required, construction materia
