Download Method Statement For Construction in word Templates

The demolition of an element of a structure that is load-bearing or otherwise related to the physical integrity of the structure is 'high risk construction work'. A safe work method statement (SWMS) must be prepared before the high risk construction work starts. Demolition work that is notifiable under the WHS Regulations involves:

DEMOLITION WORK

Demolition work includes demolishing or dismantling a structure or part of a structure that is either load bearing or related to the physical integrity of the structure. It's high risk construction work, but it doesn't include: dismantling formwork, falsework, or other structures used to provide support, access or containment during construction
