Effective awk Programming Universal Text Processing and ...

AWK is a domain-specific language designed for text processing and typically used as a data extraction and reporting tool. Like sed and grep, it's a filter, and is a standard feature of most Unix-like operating systems. The AWK language is a data-driven scripting language consisting of a set of actions to be taken against streams of textual data – either run directly on files or used as part of a pipeline – for purposes of extracting or transforming text, such as producing formatted ...
