### Elongated Skulls Of Peru And

Locations of Elongated Skulls in Peru . Paracas is a desert peninsula located within Pisco Province on the south coast of Peru, and the skulls there are known to range from 2800 to 800 years old. An example found in 2015 was a mummified baby's skull with an enlarged cranium . This finding is suggestive of a genetically elongated skull since the process of ACD takes at least 6 months to produce the desired effect.

### Elongated Skulls Found in Peru Could Be Aliens?

the drawing of the statues of all tuts family including aunts and sisters, etc made a perfect picture of the haploid form of the elongated skulls being on the x chromosome and in only having one in males resulted in defects and mutations in the few males who lived to produce all the endless sisters and aunts since males do not have the second x to moderate the terrible defects the locus causes. thi si why so many of those ladies lived long enough to marry their grandfathers.

### Amazon.com: Elongated Skulls Of Peru And Bolivia: The Path ...

The elongated skulls of Paracas in Peru caused a stir in 2014 when a geneticist that carried out preliminary DNA testing reported that they have mitochondrial DNA "with mutations unknown in any human, primate, or animal known so far". Now a second round of DNA testing has been completed and the results are just as controversial - the skulls tested, which date back as far as 2,000 years, were shown to have European and Middle Eastern Origin.

### New DNA Testing on 2,000-Year-Old Elongated Paracas Skulls ...

The elongated skulls are known to be 100% natural and 200% stranger than anything we've ever encountered so far. Their eye sockets are huge and their sagittal suture is missing. They have a huge depression where the two hemispheres are supposed to be too among other slight differences from a typical human skull.

### New DNA Results Released from the Paracas Elongated Skulls

Artificial cranial deformation or modification, head flattening, or head binding is a form of body alteration in which the skull of a human being is deformed intentionally. It is done by distorting the normal growth of a child's skull by applying force. Flat shapes, elongated ones (produced by binding between two pieces of wood), rounded ones (binding in cloth), and conical ones are among ...

### Artificial cranial deformation - Wikipedia

The scientist Brien Forster has provided an update on recently published DNA results in the elongated skulls of Paracas, Peru. This is very revealing research, not only because academics have refused to study them for decades, but also because it is clear that they are part of a very different culture.

### FINALLY: DNA Results Of The Paracas Elongated Skulls Of Peru
