"explain, in a way that can be understood even by a reader approaching modern biology for the first time, how the living cell works." This book is derived in part from the larger textbook by the same authors, *Molecular Biology of the Cell*, 5th edition (Garland Science, 2008). The value of this abridged book ...

Essential Cell Biology / Edition 5 by Bruce Alberts, Karen ...

A potentially transformative book if you are interested in learning how evolutionary processes shape the mind! As one of the first cyberneticists, Bateson shows how the mind consists of a series of relationships, and goes on to point out that any instance of these same relationships in nature (such as in a plant or animal) may also be said to exhibit mind.

Guilford Press, 1992. ... Thoroughly scholarly and professional, yet lucidly accessible, this is essential reading for anyone interested in the psychodynamics of the mind. Irvn DeVore, Ph.D., Chair, Department of Anthropology, Harvard University.

Slavin & Kriegman: The Adaptive Design of the Human Psyche

Neontology is a part of biology that, in contrast to paleontology, deals with living (or, more generally, recent) organisms. It is the study of extant taxa (singular: extant taxon): taxa (such as species, genera and families) with members still alive, as opposed to (all) being extinct. For example: The moose (*Alces alces*) is an extant species, and the dodo (*Raphus cucullatus*) is an extinct species.

Neontology - Wikipedia

Developmental biology is the study of the process by which animals and plants grow and develop. Developmental
