Conditioners: The fluids used in refrigerators and air-conditioners are known as refrigerants. The refrigerant absorbs the heat from evaporator, which is at a low temperature and distributes that heat to the atmosphere, which is at a high temperature. In air conditioners, the refrigerant absorbs room heat and throws it in to the atmosphere

A number of  
environmental,  
geotechnical and  
structural engineering  
problems are  
intimately linked to  
fluid mechanics as  
well. Consider, for  
example, the synergy  
of fluid principles in air  
pollution control, water  
and wastewater  
treatment,
