#### Harley Engine Sputters

Harley Engine Sputters The problem of having an engine “sputter” is typically caused by a fuel system issue. For pit bikes with smaller cc displacement engines, in order for a cylinder to fire efficiently, three separate components must work together; the fuel

#### Harley Engine Sputters - discovervanuatu.com.au

Sounds like your carb needs the fuel/air mix adjusted..uses all the gas at high speed but has excess at low speeds...find your adjusting screw and at med throttle slowly screw it clockwise until the engine starts to sputter then back it out until it starts to sputter again then continue to do this until you reach ideal mix where it runs the best it can..then go slowly through the throttle up and down..when set..unjust your idle speed screw to your ideal idle speed..if this dies not fix ...

#### Harley sputters at cruising speeds, but idles fine and ...

The engine must be cold. In some cases the IAC is the culprit, it works in unison with the TPS, it must be at the end of its range, as there are 67 steps of IAC from cold to fully warm, so if the bike has been started with the new TPS out of the 0% position, the ECM now thinks the IAC position is at the correct cold setting, which its now not.

#### Sputtering, loss of power and no codes | V-Twin Forum

The problem of having an engine “sputter” is typically caused by a fuel system issue. For pit bikes with smaller cc displacement engines, in order for a cylinder to fire efficiently, three separate components must work together; the fuel delivery system (carburetor), the ignition coil and wires and the spark plug.

#### My bike is sputtering whenever I give it full throttle

There are several reasons why a motorcycle sputters. The most common reasons are carburetor issues such as a vacuum leak, fuel leak, or tuning issues. Other culprits could include corroded or cracked spark plugs or spark plug wires, a faulty ignition coil, a clogged air filter, or engine timing issues.

#### 5 Reasons Why Your Motorcycle Is Sputtering

After holding this speed for a few miles, it starts sputtering like it has a bad spark plug or gas. I have ran at least 4 tanks of fuel through the bike and at a slow pace up and down the road, the bike is strong.

#### Harley Started to Misfire | Fix My Hog
