When scientists speak of experiments, in the strictest sense of the word, they mean a true experiment, where the scientist controls all of the factors and conditions.. Real world observations, and case studies, should be referred to as observational research, rather than experiments.. For example, observing animals in the wild is not a true experiment, because it does not isolate and ...

As the water moves up the strip, it will carry the different compounds in the marker with it. The lighter (smaller) compounds will move faster, and the heavier (larger) compounds will move slower. This will separate the compounds out into "bands" based on their size. This is a slow process, however.

How to Do Simple Chromatography: 10 Steps (with Pictures)
