Instructional Technology and Media for Learning

Media are the replicable “means”, forms, or vehicles by which instruction is formatted, stored, and delivered to the learner (Schwen, 1977). There are normally two types of training media within a learning program. The first is the instructional setting or major media.

department is to provide teachers and students with the tools and resources necessary to become 21st Century Learners within a safe and robust learning network. The department is committed to maintaining equipment and resources by keeping them up-to-date and in good working order.

Instructional Media/Technology / Home

The instructional processes inherent in the “from” approach to using media and technology in schools can be reduced to a series of simple steps: 1) exposing students to messages encoded in media and delivered by technology, 2) assuming that students perceive and encode these messages, 3) requiring a response to indicate that messages have been received, and 4) providing feedback as to the adequacy of the response.
