We would be grateful to readers for suggestions for improvement. "Forensic" is related to "forum" and refers to any public discussion or debate.

INTRODUCTION TO ENVIRONMENTAL FORENSICS

The field of environmental forensics has expanded greatly in the last 20 years, growing from a specialized data analysis effort focused on analytical chemistry data to a multidisciplinary, multifaceted range of applications of chemical, geospatial, historical, hydrogeological,

10.1. Introduction. Many environmental forensic projects deal with chemicals that occur as families of compounds, such as polychlorinated biphenyls (PCBs), polychlorinated dibenzo-p-dioxins and polychlorinated dibenzofurans (PCDD/Fs), and polycyclic aromatic hydrocarbons (PAHs). The relative amount of one compound within that family to other compounds can be used to chemically fingerprint environmental samples.

Writing in Environmental Forensics: Issues in Environmental Science and Technology, Ronald Hester and Roy Harrison state that environmental-forensics is a combination of analytical and environmental chemistry which can be usefully applied within a legal context via "field analytical studies and both data interpretation and modelling connected with the attribution of pollution events to their causes."
