Cluster Configuration. DigitalOcean Managed Databases offers three types of nodes: The primary node of a database cluster processes queries, updates the database, returns results to clients, and acts as the single source of data for all other nodes.. Standby nodes are copies of the primary node that automatically take over if the primary node fails. . Database clusters may have zero, one, or ...

Three worldwide (pandemic) outbreaks of influenza occurred in the 20th century: in 1918, 1957, and 1968. The latter 2 were in the era of modern virology and most thoroughly characterized. All 3 have been informally identified by their presumed sites of origin as Spanish, Asian, and Hong Kong influenza, respectively. They are now known to represent 3 different antigenic subtypes of influenza A ...

In physics, a force is any interaction that, when unopposed, will change the motion of an object. A force can cause an object with mass to change its velocity (which includes to begin moving from a state of rest), i.e., to accelerate. Force can also be described intuitively as a push or a pull. A force has both magnitude and direction, making it a vector quantity.
