The Muirhead® Programmable Lubrication Controller has been designed with flexibility in mind. The Controller will interface into an existing lubrication system or can be incorporated into a new grease system. The Controller is programmed to automatically activate the grease pump and it will also monitor the pressure switch to deactivate the pump.

PRODUCT LUBRICATION CONTROLLER OUTLINE

The LMC 101 is a universal control and monitoring device suitable for single-line and progressive lubrication systems. Designed for off-road and mobile equipment only in drivers cabin use or industrial indoor use, this controller also can be utilized for any low-voltage lubrication application. Time or controller mode can be set for both systems.
