## **Neurological emergencies - Oxford Medicine**

Neurological emergencies are common and frequently devastating. Every year, millions of Americans suffer an acute stroke, severe traumatic brain injury, subarachnoid hemorrhage, status epilepticus, or spinal cord injury severe enough to require medical intervention [1-10].

## **Time-critical neurological emergencies: the unfulfilled ...**

Mortality and morbidity remain high from neurological emergencies such as acute stroke, traumatic brain injury, and hypoxic-ischemic encephalopathy after cardiac arrest. Decisions regarding initial aggressiveness of care must be made at the time of presentation and perceived prognosis is often used as part of this decision-making process.

Objective: Increasing number of neurological problems are being described in COVID-19 disease, but their frequency and type have not been defined. In this study we sought to determine the extent of neurological manifestations of COVID-19 in a prospective series of unselected patients admitted to the general medicine wards of our hospitals due to COVID-19 and who were examined by a team of ...
