The last row of the periodic table has just been completed, with the announcement of four new elements (with the numbers 113, 115, 117 and 118), although they don't yet have names or symbols. One of the last elements to officially receive them was number 112, named copernicium (Cn) in February 2010 in honor of astronomer Nicolaus Copernicus, fourteen years after German scientists created a ...
