Pesticide Record Keeping for Pest Controllers
A borehole of approximately 1 to 2 millimeters runs parallel to the height and width of the book. The cigarette beetle (Lasioderma serricorne) is a small, light-brown flying beetle that commonly infests books. The beetle's larvae are one of the types popularly known as bookworms, with eggs laid on the spine of a book and along the edges. Immediately upon hatching, the larvae tunnel under the binding cover, especially down the spine area.
