other CVT. It is unique to the CVT it came with. In fact, if you exchange a CVT while reusing the original TCM, or swapping the original TCM with a used one, a "calibration mismatch" code P167A will set. In that case, you'll have to use a factory scan tool to go through a calibration procedure to recalibrate the TCM and ROM.

Stepper motor (step motor) RE0F10A / JF011E is a device that switches the CVT up and down. Failure of the stepper motor leads to the fact that there is only one gear - forward and backward. In this case, there is an error of breaking the chain of the stepper motor. The most expensive repair of CVT happens when the pressure in the system drops.
