I had the opportunity to meet with John Boone, Ph.D., FAAPM, president of AAPM, and discuss some of the current trends in medical physics. One of the more exciting trends he is seeing is the movement toward magnetic resonance (MR)-guided radiation therapy.

“Radiation therapy has always been image guided for the last 20, even 30 years — it started with the radiographic systems, moving into computed tomography (CT) and now we are seeing a trend toward MR-guided radiation therapy,” he ...
