Rocks, Gems and Minerals: A Fully Illustrated ...

Certain organic materials, such as amber and coral, are also classified as gemstones, although they have no crystal structure at all, and would not even be described as organic minerals. Actually amber is classified as a mineraloid ('somewhat mineral-like') along with amorphous materials like opal and mercury.

Rocks and Minerals : A Guide to Minerals, Gems, and Rocks ...

Rocks are made from minerals and can come in every size: They can be tiny pebbles or mountains big enough on which to climb or drive. Rocks do not have a special chemical or mineral makeup. While most rocks are not cut or polished to be used as gemstones, some rocks, including lapis lazuli, are classified as gems.
