SEDIMENTARY BASINS AND PETROLEUM GEOLOGY OF THE MIDDLE EAST

On oceanic crust, basins are likely to be subducted, while marginal continental basins may be partially preserved, and

Access PDF Sedimentary Basins And Petroleum Geology Of The Middle East

intracratonic basins have a high probability of preservation. Sedimentary basins are of great economic importance. Almost all the world's natural gas and petroleum and all of its coal are found in sedimentary rock. Many metal ores are found in sedimentary rocks formed in particular sedimentary environments.
