Snare The Drum

The snare drum or side drum is a percussion instrument that produces a sharp staccato sound when the head is struck with a drum stick, due to the use of a series of stiff wires held under tension against the lower skin. Snare drums are often used in orchestras, concert bands, marching bands, parades, drumlines, drum corps, and more.

Snare drum - Wikipedia

Snare drum, also called side drum, military and orchestral percussion instrument having several gut, nylon, wire, or wire-covered silk strings (snares) stretched across the lower, or snare, head; the snares vibrate sympathetically with the lower head (to which vibration is transmitted from the upper, or batter, head by air vibrations inside the drum), causing a snappy, penetrating, relatively high-pitched sound.

Snare drum | musical instrument | Britannica

A snare drum is a percussion instrument distinguished by its bright, snappy, treble-forward sonic character and the metal snare wires pulled tight beneath its lower membrane.

Snare Drum Guide: 7 Types of Snare Drums - 2020 - MasterClass

Snare drums are a type of drum that makes a distinct cracking sound when hit with a drumstick. They are also the type of drum on which the drum roll was perfected. These drums owe their sound to snares, which are plastic, gut, or metal cords or wires that extend across the bottom of the drum. The snare drum is a major component of a a drum kit.
