other communication wire, or wirelessly.. A classic example of a communication device is a computer modem, which converts a computer's digital information to an analog signal for transmission over a telephone line. Similarly, a modem receives analog signals, and converts them to ...

## **What is a Communication Device?**

Near Field Communication (NFC): Near field Communication is not that similar to Bluetooth but many people think it is. With NFC you will not need to pair the devices and it has a smaller range. The technology used is RFID tech. A chip will be in the debit card and this operates as one part of the wireless link between the card and the machine.
