Cyanotypes tend to increase their colour
depth as they dry and take up oxygen. A
few drops of hydrogen peroxide in the
final rinse water can help speed along
the colour saturation, and is probably
worth doing before any bleach/toner

sequence to ensure full density.

Cyanotypes (Sunprint)

Cyanotype sun printing is a great way to make use of the summer sun, and while you can purchase pre-made sunprint paper, these often come on very thin, very low-quality paper. Plus, if you get the two solutions that combine to make cyanotype prints you can do fabric printing too!
