When you print an 8x10" print, it's likely that someone will hold it an arm's length away from their face. So we need a resolution that will be as fine as our eyes can resolve (and the printer can pull off) at that distance. But when you print very large (like a 24x36" print), no one would stand that close to it.

Why the Fine Print Is Even Worse Than You Think

There are many new distribution options for the independent producer. The old media includes theatrical, broadcast/cable, home video; new media's alphabet soup includes TVOD, SVOD, AVOD, EST, PPV, streaming and nontraditional theatrical. As new distribution channels develop, new distribution companies emerge. But not all distributors are effective in all mediums and markets. Just as you ...
