THE SPORTS MEDICINE PATIENT
ADVISOR 7. WALL SQUAT WITH A BALL:
Stand with your back, shoulders, and
head against a wall and look straight
ahead. Keep your shoulders relaxed and
your feet 1 foot away from the wall and a
shoulder's width apart. Place a rolled up
pillow or a soccer-sized ball between
your thighs.

THE SPORTS MEDICINE PATIENT
ADVISOR recovers,
not by how many days or weeks it has been
since your injury occurred. In general, the
longer you have symptoms before you start
treatment, the longer it will take to
get better. You may safely return to
your sport or activity
when the muscles are no longer in
spasm and you can move your shoulders and
arms without pain.
