Theory Of Colours Johann Wolfgang

Theory of Colours (German: Zur Farbenlehre) is a book by Johann Wolfgang von Goethe about the poet's views on the nature of colours and how these are perceived by humans. It was published in German in 1810 and in English in 1840. The book contains detailed descriptions of phenomena such as coloured shadows, refraction, and chromatic aberration.

Theory of Colours - Wikipedia

Johann Wolfgang von Goethe published Theory of Colors in 1810 and it would become one of the first explorations of how certain colors can create specific functions of psychological reactions when they are viewed. Much of Goethe's work was initially rejected by the scientific community.

Johann Wolfgang Von Goethe Color Theory Explained - HRF

Johann Wolfgang von Goethe also proposed a symmetric color wheel and put emphasis on the importance of magenta, in contrast to Newton, who counted only spectral colors as fundamental. In his color wheel, Goethe also included several aesthetic qualities titled as "allegorical, symbolic, mystic use of colour".

Johann Wolfgang von Goethe and his Theory of Colours

By the time Goethe's "Theory of Colours" appeared in 1810, the wavelength theory of light and color had been firmly established. To Goethe, the theory was the result of mistaking an incidental result for an elemental principle. Far from pretending to a knowledge of physics, he insisted that such knowledge was an actual hindrance to understanding.

Theory of Colours : Johann Wolfgang von Goethe : Free ...

The wavelength theory of light and color had been firmly established by the time the great German poet published his Theory of Colours in 1810. Nevertheless, Goethe believed that the theory derived from a fundamental error, in which an incidental result was mistaken for a elemental principle. Far from affecting a knowledge of physics, he maintained that such a background would inhibit ...

Theory of Colours: Goethe, Johann Wolfgang Von ...

This color has a peculiar and almost indescribable effect on the eye. As a hue it is powerful - but it is on the negative side, and in its highest purity is, as it were, a stimulating negation. Its appearance, then, is a kind of contradiction between excitement and repose." — Johann Wolfgang von Goethe, Theory of Colours
