Using Bollinger Bands to Gauge Trends - Investopedia

Bollinger Bands make it easy to buy low and sell high. Traders will open a position when the trend line is nearing the bottom of the Bollinger Band range. Traders will need to close a position when the trend line reaches the top of the range. Rules for Bollinger Band Bounce Trading Strategy *To make it simple, I am going to use the same (GBPUSD 4-hour chart) example for each of these rules.

How to Use Bollinger Band Indicators - Trading Strategy Guides

Since the MACD has no upper or lower limit, traders do not think of using the tool as an overbought/oversold indicator. To identify when a stock has entered the overbought/oversold territory, look for a large distance between the fast and slow lines of the indicator.

MACD - 5 Profitable Trading Strategies

The next screenshot shows a chart with 2 trend indicators (the ADX and the Bollinger Bands). Again, the purpose of both indicators is the same: identifying trend strength. You can see that during a trend, the Bollinger Bands move down and price moves close to the outer Bands. At the same time, the ADX is high and rising which also confirms a trend.

How To Combine The Best Indicators And Avoid Wrong Signals

In a downtrend, you can short near the upper Bollinger Band. When the Bollinger Bands is in a squeeze, it signals the market is "ready" to breakout. You can use the 20-period moving average to time your entries in trending market. You can use Bollinger Bands and RSI divergence to find high probability reversal trades.

The Bollinger Bands Trading Strategy Guide

How to apply Bollinger Bands to the MACD indicators for trade signals that are "invisible" to other traders. Using "Indicators of Indicators" to create an "invisible edge" over other traders. Enjoy the video! Leave your questions and comments below!
