Qualifying Visual Inspectors - The benchmarking process

Maybe the work is highly automated with some basic manual functions or cycle times are so short that interaction with an application would slow production. Whatever the reason, providing electronic, visual work instructions in a simple format that is highly accessible, mobile and easy to maintain adds quite a lot of value.

Visual Work Instructions - Different Approaches and Use cases

Visual Inspection. Visual inspection provides a means of detecting and examining a variety of surface flaws, such as corrosion, contamination, surface finish, and surface discontinuities on joints (for example, welds, seals, and solder connections). Visual inspection is also the most widely used method for

Visual inspection can also be called as
100% inspection. It is usually adopted to
prevent shipping of a non-compliant
product. Visual inspection is a method in
which the unit or product is inspected
with unaided eye either alone or with
any aid, on the basis of which specific
unit or product is evaluated.
